Professional Summary

Full stack developer with a **computer engineering** background and over 4 years of experience. Recently completed a **Post-Graduate** Certificate in Web Development at Humber College. Proficient in JavaScript, MERN stack, PHP, REST and GraphQL API, and advanced **front-end** and **back-end** technologies. Developed 5+ scalable, secure applications with a focus on optimal user experience.

Technical Proficiencies

Frontend Technologies: HTML5, CSS3 (Bootstrap, Tailwind CSS), JavaScript (React, React-Query), Next.js
Backend Technologies: Node.js, Express.js, PHP (Laravel), ASP.NET (MVC), WordPress development
Databases and APIs: MongoDB, MySQL, SQL Server, RESTful API, GraphQL
Testing & Methodologies: Jasmine, Cypress, Karma, Agile SDLC, DevOps
DevOps & Cloud: Git, GitHub, Docker, Firebase, AWS, Serverless Framework

Career Highlights

Developed and deployed a full-stack expense tracking app using GraphQL, React, Node.js, and MongoDB, featuring secure authentication, transaction management, and optimized performance with Apollo Client.

Developed a scalable freelance marketplace app using React.js, Node.js, and Tailwind CSS with enhanced security features, including OTP verification, ensuring robust user authentication.

Work Experience & Projects

Web Developer **May 2024 – Present**
rCycle, Toronto, ON

- Develop custom WordPress themes and plugins using PHP, JavaScript, and APIs in a local server environment (such as LOCAL by Flywheel), to meet specific client and project requirements.
- Customize existing WordPress themes and plugins to align with branding, design, and functionality needs.
- Collaborate with cross-functional teams to achieve development and project objectives.

Full-Stack Developer **Nov. 2021 – May 2024**
Staples, Richmond Hill, ON

- Developed and maintained e-commerce platform components using React for the front-end and Node.js for the back-end, improving the online shopping experience and contributing to a 15% increase in online sales.
- Collaborated with the Staples' IT team to design and implement new features for the company's intranet portal, using technologies such as Node.js, Express.js, and MongoDB, to improve employee engagement and productivity.

React Developer **Oct. 2019 – Oct. 2021**
Digiato

- Developed and maintained front-end code for **responsive** single-page websites using **React**, ensuring clean, sustainable, and scalable code to optimize performance across all devices and browsers.
- Maintained and optimized existing code by testing new React features, fixing bugs, and monitoring code performance to ensure the UI/UX designs met usability guidelines and optimized front-end performance.

Education & Certifications

Post-Graduate Certificate in Web Development, Humber College 2024

Scaled Agile Inc. - Frameworks 5 Agilest (SAFe®) 2022

Bachelor's Degree in Computer Software Technology Engineering, Azad University 2018

Full-Stack Web Developer Skills

- In depth experience with JavaScript, HTML, CSS
- Proficient in React.js, Node.js, Next.js, and PHP
- Experience with building and testing RESTful APIs
- Implement front-end libraries and frameworks
- Develop custom WordPress themes
- Familiarity with UX/UI design principles and tools
